"Computers aren't the thing. They are the thing that gets us to the thing." - Halt And Catch Fire

Bio

I am a third-year Ph.D. student at the Department of Control and Computer Engineering of Polytechnic of Turin. Presently, I work on the understanding and regularization of Neural Language Models. In the past, I worked on modeling and forecasting financial time series to build ML-enabled trading systems.

I currently live in Turin. I love reading and watching Sci-Fi and playing basketball. I also like DIY and automating boring stuff. Besides that, I am a passionate learner. I spend countless hours on lectures and tutorials about languages, frameworks, and technologies.

I frequently update my personal website with projects, recent publications, and other fun stuff.

Research interests. Neural Architectures, Language Models, Explainable AI, Quantitative Trading

Education

Politecnico di Torino *Torino, Italy*

Ph.D. at Department of Control and Computer Engineering *2018 - 2022 (exp.)*

- Advisor: Elena Baralis

Politecnico di Torino *Torino, Italy*

MD in Computer Engineering, Data Science track *2016 - 2018*

- Grade: 110/110 *cum Laude*

Politecnico di Torino *Torino, Italy*

BD in Computer Engineering *2013 - 2016*

- Grade: 110/110

Publications

I believe in open-access research. Most of my papers are free to read, and the experimental code is open-sourced whenever possible. All the pointers are collected on my website.

Selected

Giuseppe Attanasio and Eliana Pastor. "PoliTeam @ AMI: Improving Sentence Embedding Similarity with Misogyny Lexicons for Automatic Misogyny Identification in Italian Tweets". en. In: *EVALITA Evaluation of NLP and Speech Tools for Italian - December 17th, 2020*. Ed. by Valerio Basile et al. Accademia University Press, 2020, pp. 48–54. ISBN: 9791280136329. DOI: 10.4000/books.aaccademia.6807. URL: http://books.openedition.org/aaccademia/6807 (visited on 08/16/2021)

Research activities

Italian CLIP. During the HuggingFace JAX Community Week, we had the chance to specialize OpenAI’s CLIP for the Italian language. CLIP is one of the most recent multi-modal models that connect images and text. The original model is limited to English, so we decided to extend its capabilities. We hence presented the first CLIP model for the Italian Language, trained on more than 1.5 million high-quality image-text pairs. The released model outperforms the multilingual CLIP model on the tasks of image retrieval and zero-shot classification.

The project was selected among the 15 finalist projects - out of 100 - of the Flax/JAX Community Week organized by HuggingFace in partnership with Google and received a special nominee in the final evaluation round.

KMaster Fleet Management for KMaster (Telepass). I took part in a joint research project between my research group and the company KMaster (Telepass SpA). We designed and implemented an end-to-end machine learning and clustering-based pipeline to characterize driving behaviors and fleet management.

Machine Learning at Polito. We founded MAchine Learning At poliTO (MALTO), a university-funded student team at Politecnico di Torino.

The main goal of the team is to take part in various data science competitions. These competitions typically consist in achieving high performance on machine learning problems (e.g. classification or regression), proposing novel, cutting-edge approaches.

Teaching activities

Academy

Teaching Assistant. I have been a teaching assistant to several courses at Politecnico di Torino. In total, I have held 171 hours of complementary teaching.

- (2021) **Data science lab: processes and methods**, 60h, MD in Data Science and Engineering
- (2020) **Data science lab: processes and methods**, 39h, MD in Data Science and Engineering
- (2020) **Business Intelligence for Big Data**, 21h, MD in Industrial engineering and management
- (2019) *** Data science lab: processes and methods**, 39h, MD in Data Science and Engineering
- (2019) **Business Intelligence for Big Data**, 21h, MD in Industrial engineering and management
- (2018) **Basi di dati**, 21h, BD in Computer Engineering
- (2018) **The Fourth Industrial Revolution: Promises and Pitfalls in Blending New and Traditional Approaches in Manufacturing and Service Sectors**, 30h, Alta Scuola Politecnica School

* While Introduction to Databases and Business Intelligence were pre-existent and consolidated courses, I have been a major contributor in shaping *Data Science Lab: process and methods*, launched in September 2019 and currently one of the central courses in the Data Science and Engineering master degree at Politecnico.

The course is the first introduction to the Python programming language and the basics of Data Science and Machine Learning libraries for MD students. We worked hard to provide students with comprehensive exercises and solutions (10 laboratories, for a total of 60+ pages of lab exercises and 250+ pages of solutions). All the material is freely available on the course website.

Research Bites. I have devised and contributed to the launch of Research Bites, a series of short research talks and seminars held by PhD students for students of the course Data Science Lab: process and methods. The goal of RBs is to disseminate cutting-edge research topics, in short, high-level pills. The series is now in its second edition.

Master Thesis Supervisor. I have supervised the work of 9 master students.

Industry

I have held consulting hours and courses twice.

- (2021) **Data Theory: Data Visualization with Python**
  Reply: Digital Services, Technology and Consulting, Turin (online)
- (2020) **Python technologies for Data Analytics**
  Applied Mechatronic Engineering & Technologies, Turin

Peer reviewing

I reviewed at least one work submitted to the following venues:

- ACM KDD SIGKDD Conference On Knowledge Discovery And Data Mining. Editions: 2020, 2021
- ACM SIGMOD/PODS International Conference on Management of Data. Editions: 2021
- IEEE ICDE: IEEE International Conference on Data Engineering. Editions: 2020
- IEEE ICDM: IEEE International Conference on Data Mining. Editions: 2021
- ACM SAC: ACM/SIGAPP Symposium On Applied Computing. Editions: 2021
- EDBT: International Conference on Extending Database Technology. Editions: 2020, 2021
- DaWaK: International Conference on Big Data Analytics and Knowledge Discovery. Editions: 2019, 2021

I reviewed at least one work submitted to the following journals:

- Expert Systems With Applications, Elsevier
- Future Generation Computer Systems, Elsevier
- Machine Learning With Applications, Elsevier

Work Experience

Kupata S.r.l. *Torino, Italy*

Founder *Nov. 2016 - 2020*

- Kupata's main goal is to streamline the Lost and Found process. It brings innovation with a solution that helps people in returning items in a simple, secure, and undisclosed way. The business involves a physical object, the Kupa, and a social community that encourages members to act in the right way.

Consoft Sistemi S.p.A. *Torino, Italy*

Curricular intern *Mar. 2016 - Jul. 2016*

- I participated to the bootstrap phase of the Consoft's proprietary Knowledge Base platform. We built our solution upon Orange HRM, an open source PHP-based platform.

Skills

I am familiar with *italicized* entries.

Programming	C, C++, Python, Java, *C#, JavaScript, PHP, Matlab, SQL*
Framework	*Hadoop, Spark*
Scripting	Bash, *Awk*
DevOps	*AWS*, *GCP*, *Docker*
Front-end	*Hugo, React, Dash*
Graphics	Inkscape, GIMP, *Blender, Unity 3D*
Languages	Italian, English, *Spanish, French*
