1 Introduction

1.1 Current Position

I am a senior postdoctoral researcher in the SARDINE group at Instituto de Telecomunicações (IT), Lisbon, hosted at Instituto Superior Técnico and working with Prof. André F. T. Martins. Since July 2026, my position has been funded by Amália, Portugal's sovereign large language model initiative; from February 2024 to June 2026, it was funded by the Center for Responsible AI, within the Portuguese Recovery and Resilience Plan.

My research lies at the intersection of **interpretability, safety, and fairness of AI**. I develop technical and methodological approaches to detect, mitigate, and prevent the harms of AI systems—particularly large language, speech, and multimodal models—on people, communities, and society. My current focus is the alignment and safety of AI agents, which I approach through interpretability. I lead a research line on interpretability, fairness, and safety, coordinating three PhD students and one postdoctoral researcher. In the past four years, I have **co-authored more than 50 peer-reviewed papers, of which 25 at CORE A*/A or relevant conferences or SCImago Q1 journals** in the area of NLP, speech, and machine learning, secured seven competitive research and computing grants as PI or co-PI (most recently ARISA, ranked first in its FCT evaluation panel), and released tools and models adopted at scale by both academia and industry.

1.2 Education

- **Nov. 2018 – Oct. 2022 — PhD in Computer and Control Engineering**, Politecnico di Torino, Italy.
  Thesis: *Dissecting Deep Language Models: The Explainability and Bias Perspective*.
  Advisor: Prof. Elena Baralis.
- **Oct. 2016 – Oct. 2018 — MSc in Computer Engineering** (Data Science track), Politecnico di Torino, Italy. Grade: 110/110 *cum laude*.
- **Oct. 2013 – Oct. 2016 — BSc in Computer Engineering**, Politecnico di Torino, Italy. Grade: 110/110.

1.3 Professional Experience

- **Feb. 2024 – present — Postdoctoral Researcher**, Instituto de Telecomunicações, Lisbon, Portugal. PI: Prof. André F. T. Martins. Funded by the Center for Responsible AI (Project: NextGenAI) from Feb. 2024 to Jun. 2026, and by Amália since Jul. 2026.
- **Oct. 2022 – Feb. 2024 — Postdoctoral Researcher**, Department of Computing Sciences, Bocconi University, Milan, Italy. PI: Prof. Debora Nozza (MilaNLP group, head: Prof. Dirk Hovy).

2 Research

2.1 Bibliometric Indicators

All indicators refer to my Google Scholar profile (ID: `IuhnRJQAAAAJ`), retrieved on October 28, 2026.

- **Peer-reviewed publications**: 59, of which 25 at CORE A*/A conferences, relevant NLP conferences not yet indexed (e.g., COLM), or SCImago Q1 journals (marked † in the List of Publications, Section 6).
- **h-index**: 22.

- **i10-index**: 39.
- **Total citations**: 2,912.

2.2 Coordination of and Participation in Scientific Projects

Coordination (PI / co-PI).

- **2026 — FCT Exploratory Research Projects** (PI). Project: *ARISA: Auditable and Receptive Interpretability for Secretive Agentic AI* (Jan. 2027 – Jun. 2028). Funds: € 60,000, to hire two to three pre-doctoral researchers. **Ranked first among all candidates in the Electrical and Electronic Engineering panel** of this nationwide call.
- **2025 — EuroHPC Extreme Scale Access** (co-PI). Project: *SMURF4EU: A Suite of Multimodal Reasoning Foundation Models for Europe*. Compute: 2M GPU hours.
- **2025 — FCT Advanced Computing** (PI). Project: *MELT: Multilingual Efficient Learning for Speech-Text Models*. Compute: 87,600 GPU hours.
- **2025 — EAMT Sponsorship** (PI). Project: *Ouvia: A User-Centered Benchmark for Usability Assessment of Speech Translation Systems*. Funds: € 5,200.
- **2023 — EAMT Sponsorship** (co-PI). Project: *GeFMT: Gender-Fair Language in German Machine Translation*. Funds: € 5,200.
- **2023 — CINECA ISCRA-C** (PI). Project: *ItaLLM: Advancing Beyond-English Language Models*. Compute: 10,200 GPU hours.
- **2023 — Google Cloud Credits** (PI). Project: *Gender Bias in Large Language Models*. Funds: € 4,800.

Participation.

- **Jan. 2025 – present — Amália**, Portugal's first large-scale language model for European Portuguese, a government-funded sovereign AI initiative coordinated by IT and IST, which has funded my position since Jul. 2026.
- **Feb. 2024 – Jun. 2026 — Center for Responsible AI** (Portuguese Recovery and Resilience Plan), which funded my position and framed my research on fair and safe translation technologies.

Research groups.

- **Feb. 2024 – present** — Senior member of the **SARDINE** group, Instituto de Telecomunicações, Lisbon. I lead a research line on interpretability, fairness, and safety, coordinating three PhD students and one postdoctoral researcher (see Student Guidance and Supervision).
- **Oct. 2022 – Feb. 2024** — Member of **MilaNLP**, Bocconi University, Milan.
- **Nov. 2018 – Oct. 2022** — Member of the **DBDMG** (Database and Data Mining Group), Politecnico di Torino.

2.3 Prizes, Awards, and Titles

- **2025 — ASN**, Italy's national scientific habilitation (Abilitazione Scientifica Nazionale) as Associate Professor (Seconda Fascia), sector 01/B1 – Informatica (Group 01/INFO-01). Valid from 13/11/2025 to 13/11/2037.
- **2024 — Social Impact Paper Award**, EMNLP 2024, for *Twists, Humps, and Pebbles: Multilingual Speech Recognition Models Exhibit Gender Performance Gaps*, from among more than 2,000 accepted papers.
- **2023 — Best Student Paper Award**, CLiC-it, for *Contrastive Language–Image Pre-training for the Italian Language*.

3 Knowledge Transfer and Scientific Dissemination

3.1 Open-Source Software and Models with Broad Adoption

- **FashionCLIP** — the first contrastive vision–language model specialized for the fashion domain (published in *Nature Scientific Reports*), adopted worldwide in industry, with **more than 100 million downloads** on the Hugging Face Hub over the past three years.
- **ferret** — a Python package for benchmarking post-hoc interpretability methods (EACL 2023 System Demonstrations), with **40,000+ installations**, consistently adopted in academic coursework at several universities.

3.2 Industry and Academic Collaborations

- **Fairness in End-to-End Speech Representation Models** — subgroup bias detection in neural speech models (Wav2Vec 2.0, HuBERT). With: Amazon Alexa AI Turin (led to multiple CORE A*/A and Q1 publications).
- **Vision and Language for Fashion Concept Learning** — CLIP-based multimodal modeling of fashion concepts. With: Coveo, Coveo Labs, Stanford University, Farfetch (led to a Nature Scientific Report paper and to FashionCLIP, a largely successful open-weight CLIP model).
- **EvalRS: Rounded Evaluation of Recommender Systems** — open-source framework and data challenge on fair RecSys evaluation (CIKM 2022). With: Coveo, Stanford University, Microsoft, NVIDIA (led to a Nature Machine Intelligence paper).
- **Gender-Inclusive Communication in Italian** — detection and rephrasing of non-inclusive language in public and academic texts. With: University of Turin, University of Bologna, University of Bergamo.
- **Contrastive Language–Image Pre-training for Italian** — the first Italian multimodal CLIP model, finalist at the HuggingFace Flax/JAX Community Week. With: Bocconi University, University of Milano-Bicocca, University of Groningen.
- **ELLIS network** — participant in the 2024 ELLIS workshop *NLP for Understanding and Using Language in the World*, co-organized by Raquel Fernández and Sandro Pezzelle (University of Amsterdam).
- **Ongoing collaborations** — Carnegie Mellon University, University of Maryland, Fondazione Bruno Kessler, Bocconi University, and Università La Sapienza.

3.3 Invited Talks and Conference Presentations

Invited talks and seminars.

- **2026, upcoming** — University of Edinburgh: *Title to be defined* (invited seminar).
- **2026** — King's College Cascais: *Ethical Considerations of AI in its Everyday Uses* (invited seminar).
- **2025** — Fondazione Bruno Kessler (FBK), Trento: *Technical Scaffolding for Ethical AI: Explaining, Building, and Scrutinizing Models Under Social Axes* (invited seminar).
- **2025** — University of Verona: *Beyond the "Please, Write a Book": Methods and Ethical Concerns of Prompting AI for the Publishing Industry* (invited seminar).
- **2025** — University of Padova: *Building, Explaining, Scrutinizing AI: A Technical Lens for a Social Problem*.
- **2025** — Karger Publishers: *Confronting Modern Generative AI: Breakthroughs and Ethical Considerations*.
- **2024** — STM Annual Conference, Frankfurt (keynote): *Confronting Modern Generative AI: Breakthroughs and Ethical Considerations*.
- **2024** — University of Cambridge: *Perspectives of Gender Bias in Machine Translation: Exploring Interpretability for Fairer Translations and Issues with Evaluation*.
- **2024** — AIE, Italian Association of Publishers: *New Trends and Challenges for Generative AI in the Publishing Industry*.
- **2023** — Papers We Love, Milan chapter: *From Recurrent Models to the Advent of Attention: A Recap*.
- **2022** — SmartData@PoliTO, Politecnico di Torino: *Social Biases in LMs: Why They Are There, How Do We Measure and Mitigate Them*.

Invitation-only seminars.

- **2026 — Dagstuhl Seminar 26252**, *From Speech Translation to Multilingual Communication – New Research Challenges*, Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Wadern, Germany (June 14–17, 2026). Invited participant.

Conference presentations. I have presented my first-authored work at EMNLP (2023, 2024, 2025; oral and poster), ACL (2022, 2023, 2024; poster), EACL (2023; poster), NAACL (2023; poster), Interspeech (2026), and CLiC-it (2023).

3.4 Organization of Scientific Meetings

- **2026** — Co-organizer of the 7th edition of the **Workshop on Gender Bias in NLP** (GeBNLP), AACL 2026.
- **2024** — Co-organizer of the **Third Workshop on Safety for Conversational AI**, LREC-COLING 2024.
- **2022** — Co-organizer of the first edition of **EvalRS: A Rounded Evaluation of Recommender Systems**, data challenge and workshop at CIKM 2022.

3.5 Community Building

- Co-founder of **RiTA** (Risorse per la Lingua Italiana), an online community connecting researchers and practitioners around Italian language resources for NLP.
- Co-founder of **MALTO (MAchine Learning At poliTO)**, a university-funded student team at Politecnico di Torino that competes in data science challenges and shared tasks to this day.

4 Academic Management Activities

4.1 Research Management and Team Leadership

- **Grant management** — As PI or co-PI on seven grants, I wrote or co-wrote the proposals, justified the budgets, administered the awards, and reported to the funders (FCT, EAMT, CINECA, EuroHPC). Most are large computing allocations that require resource planning across national and European supercomputers (LEONARDO, MareNostrum 5, and JUPITER).
- **Team leadership** — I supervise three PhD students and one postdoctoral researcher on a day-to-day basis, through weekly one-to-one meetings, a group reading seminar, and structured feedback on experimental design and scientific writing. From January 2027, I will hire and supervise two to three pre-doctoral researchers on ARISA.

4.2 Editorial Activities and Program Committees

- **Ethics Chair**, EMNLP 2026 — a flagship NLP conference with 17,000+ submissions.
- **Senior Area Chair**, LREC-COLING.
- **Area Chair**, ACL Rolling Review (several cycles) and LREC-COLING.

4.3 Peer Reviewing

- **Conferences**: ACL Rolling Review (2021, 2022, 2023, 2024, 2025, 2026); ACM SIGKDD (2020, 2021); ACM SIGMOD/PODS (2021); IEEE ICDE (2020); IEEE ICDM (2021); ACM SAC (2021); EDBT (2020, 2021); DaWaK (2019, 2021).
- **Journals**: Expert Systems With Applications (Elsevier); Future Generation Computer Systems (Elsevier); Machine Learning With Applications (Elsevier).

5 Teaching and Supervision Activities

5.1 Teaching Assistantships

I have held **231 hours of complementary (laboratory and practice) teaching** at Politecnico di Torino across bachelor's, master's, and honors programs:

- **a.y. 2020/21** (6 months) — *Data Science Lab: Processes and Methods*, 60h, MSc in Data Science and Engineering.
- **a.y. 2019/20** (6 months) — *Data Science Lab: Processes and Methods*, 39h, MSc in Data Science and Engineering.
- **a.y. 2019/20** (6 months) — *Business Intelligence for Big Data*, 21h, MSc in Industrial Engineering and Management.

- **a.y. 2018/19** (6 months) — *Data Science Lab: Processes and Methods*, 39h, MSc in Data Science and Engineering.
- **a.y. 2018/19** (6 months) — *Business Intelligence for Big Data*, 21h, MSc in Industrial Engineering and Management.
- **a.y. 2017/18** (6 months) — *Basi di Dati* (Databases), 21h, BSc in Computer Engineering.
- **a.y. 2017/18** (6 months) — *The Fourth Industrial Revolution*, 30h, Alta Scuola Politecnica (joint honors school of Politecnico di Torino and Politecnico di Milano).

5.2 Pedagogical Material and Course Design

I played a key role in **launching the course "Data Science Lab: Process and Methods"** for the MSc in Data Science and Engineering at Politecnico di Torino, now a central course of the degree. With one colleague, I designed the entire laboratory track from scratch: **ten hands-on laboratories** complementary to the theoretical syllabus, with 60+ pages of exercises and **250+ pages of in-depth solutions** discussing rationale, edge cases, and alternative approaches. We used the Piazza platform for asynchronous student support. Student feedback on the course and its practical component was positive.

5.3 Guest Lectures and Tutorials

- **2026** — Luiss Guido Carli University: *How GPT is Built in 2026: Theoretical Notions, Practical Overview, and Ongoing Themes*.
- **2023** — Bocconi University: *Introduction to Contrastive Learning*.
- **2023** — Bocconi University: *Introduction to Reinforcement Learning from Human Feedback*.
- **2023** — Tilburg University: *Social Biases in LMs: Why They Are There, How Do We Measure and Mitigate Them*.

5.4 Machine Learning Schools

- **2024** — Tutor of the hands-on laboratories at the **Lisbon Machine Learning School (LxMLS)**, Lisbon.
- **2022** — Co-tutor of **Google DeepMind's Mediterranean Machine Learning (M2L) Summer School**, with ownership of the Natural Language Processing module. I designed a shared notebook guiding participants through implementing a Transformer from scratch, training it for language modeling and machine translation, and testing it for gender bias; it is publicly available as a tutorial at `https://g8a9.github.io/yet_another_jax_transformer`.

5.5 Student Guidance and Supervision

Doctoral and postdoctoral co-supervision.

- **May 2026 – present** — Lorena Calvo Bartolomé (Postdoc, Bocconi University): voice-based data annotation.
- **Nov. 2025 – present** — Beatriz Canaverde (PhD, IST / Instituto de Telecomunicações): robust evaluation of multimodal and language models. Under my supervision, Beatriz published one paper at COLM.

- **Nov. 2024 – present** — Sonal Sannigrahi (PhD, Instituto Superior Técnico): efficient speech and vision multimodal and multilingual adaptation of language models. Under my supervision, Sonal published one paper at Interspeech.
- **Nov. 2024 – present** — Daniel Chechelnitsky (PhD, Carnegie Mellon University and Instituto de Telecomunicações, CMU Portugal program): user-centered translation and multilingual systems. Under my supervision, Daniel published one paper at AIES.

Visiting PhD students at Instituto Superior Técnico.

- **May 2026 – present** — Simone Petruzzi (PhD, Sapienza University of Rome): interpretability and diffusion language models.
- **Mar. 2025 – Aug. 2025** — Dennis Fucci (PhD, Fondazione Bruno Kessler): research visit on interpretability and gender bias in speech translation models. Under my supervision, Dennis published a paper at ACL.

MSc thesis co-supervision.

- **Nov. 2018 – Oct. 2022** — During my PhD, I co-supervised **nine MSc thesis students** at Politecnico di Torino: Vittorio Pipoli, Christian Traina, Lorenzo Vaiani, Giulio Bagnoli, Gian Pietro Enzo Bellocca, Giuseppe D'Agostino, Federico Careglio, Vincenzo Savarese, and Francesca Petrocchi. All graduated without delays; several collaborations resulted in peer-reviewed publications, and some students went on to pursue PhDs.

5.6 Non-Academic Professional Teaching

- **2024** — *Generative Artificial Intelligence and Basic Prompting: How to Train AI Tools for Work in Publishing Houses*, AIE: Associazione Italiana Editori (Italian Association of Publishers), online.
- **2021** — *Data Theory: Data Visualization with Python*, Reply (Digital Services, Technology and Consulting), Turin, online.
- **2020** — *Python Technologies for Data Analytics*, Applied Mechatronic Engineering & Technologies, Turin.

6 List of Publications

The complete list of my publications, in reverse chronological order. † marks the 25 papers at CORE A*/A conferences, relevant NLP conferences not yet indexed (e.g., COLM), or SCImago Q1 journals; * denotes equal contribution.

6.1 Peer-Reviewed Publications

1. †**Attanasio, G.**, Savoldi, B., Chechelnitsky, D., Negri, M., Carpuat, M., Sap, M., & Martins, A. F. T. (2026). Ouvia: A user-centered framework for measuring usability of speech translation in real-world communication scenarios. In *Proceedings of the 2026 Conference on Empirical Methods in Natural Language Processing (EMNLP 2026)* (pp. 60698–60716).
2. †Zaranis, E., Farinhas, A., Santos, S., Canaverde, B., Ramos, M. M., Mohammed, W., **Attanasio, G.**, …, Pezzelle, S., Frank, S., Niculae, V., Elliott, D., Bernardi, R., Fernández, R., & Martins, A. F. T. (2026). How well do vision-language models understand movies? In *Proceedings of the 2026 Conference on Empirical Methods in Natural Language Processing (EMNLP 2026)* (to appear). Preprint: *Movie facts and fibs (MF^2): A benchmark for long movie understanding*, arXiv:2506.06275.

3. †**Attanasio, G.**, Vieira, I., Calvo, I., Canaverde, B., Peters, B., Menis Mastromichalakis, O., Faria, M., Furtado, J., Paulo, I., Semedo, D., Magalhães, J., & Martins, A. F. T. (2026). Lusopol: How do LLMs handle politically charged questions? The use case of Portugal. In *Findings of the Association for Computational Linguistics: EMNLP 2026* (pp. 44149–44167).
4. Chechelnitsky, D., Gururaja, S., Olojo, S., Deng, W. H., **Attanasio, G.**, Zerva, C., et al. (2026). Translating with feeling: Centering translator perspectives within translation technologies. In *Proceedings of the AAAI/ACM Conference on AI, Ethics, and Society (AIES 2026)*.
5. †Canaverde, B., Alves, D. M., Pombal, J., **Attanasio, G.**, & Martins, A. F. T. (2026). SEQUOR: A multi-turn benchmark for realistic constraint following. In *Proceedings of the Conference on Language Modeling (COLM 2026)*.
6. †Sannigrahi, S., **Attanasio, G.**, & Martins, A. F. T. (2026). AdaTS: Adaptive token sampling for efficient speech language models. In *Proceedings of Interspeech 2026*.
